

VIORYL S.A.

Industrial
Chemical Products

Exports accounting for 40% of annual sales.

10% of the turnover on R&D activities.

VIORYL SA is a Greek company established in 1946, mainly engaging in the development, production and distribution of industrial fragrances, flavours, fine chemicals, as well as plant nutrition and protection products.

VIORYL's premises are located in Afidnes, Attica (headquarters and research labs) and Thiva, Boeotia (production and warehouse).

Thanks to large investments in state-of-the-art technology as well as in qualified personnel, the company is nowadays the Greek market leader, supplying clients with innovative, high-quality products. The dynamic evolution in scientific research, combined with the firm's commitment to quality and collaboration with customers, provide VIORYL with a competitive advantage that has earned the company an excellent reputation worldwide, contributing to its continuous growth.

Every year 10% of the turnover is spend in R & D activities, supporting four major research programs in the research laboratories of the company in Afidnes, where 45 scientists (chemists, chemical engineers, agronomists and technicians) are employed.

The company's portfolio includes: Fragrances (industrial use), flavours (industrial use), fine chemicals (mainly natural flavor ingredients), plant health products (nutrition of plants and pest management, used in both conventional and organic farming) and insect repellent consumer products.

VIORYL's sales in 2019 topped 26 million euros, demonstrating consistent year-over-year growth. A substantial part of VIORYL's growth comes from exports, which in 2019 accounted for 40% of its total revenue. The company has presence in countries in Europe, Africa, Middle East, Far East and North America, with a steady expansion every year.
